DISC ORGEL CLOCKS

The Disc Orgel clock has explicitly been made to give you joy with its 27cm diameter disc, playing joyful melodies in a 45 valves music box. While the disc rotates slowly, the tune touches the hearts and souls of the listeners. Plentiful in variation, the various pieces are sure to bring you an enjoyable time.

The history of the Music Orgel can be traced back to the 18th century. Initially functioning as a time-telling music box in a clock, it branched off to become what is today a music box performing beautiful music and telling time simultaneously. With the first music box being made by a clock technician in Switzerland, the Disc Orgel debuted in 1886. Different patterns of holes on the various discs determine the type of melody played, each expressing a unique piece.

Magic Motion Clocks

The concept of Magic Motion clocks comes from “Karakuri,” a traditional Japanese mechanical device that takes you by surprise, utilizing a complex system. RHYTHM created the Magic Motion clocks, mimicking the overall idea behind the mechanisms and adding different features to make it noticeable, among other clocks. Lights, synchronized with the melodies played, illuminate not only the clock itself but also the environment surrounding it. Genuine crystals embedded in the clock are a perfect combination with the wooden frame, coming in a variety of different types, embellishing the clock even further. Whether it be the living room or the master room, the wall clock is sure to suit any room, lightening up the mood to create a comfortable environment for everyone. As a bonus, the night sensor function temporarily disables all features except the time-telling feature when the room is dark, allowing users to enjoy the tranquility while gazing at the beauty of the clock.
