The “washi” paper mechanism Rhythm continues to produce

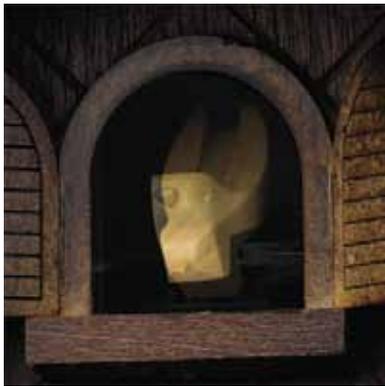

The warm sound is produced when compressed air is instantly pushed through strips of traditional Japanese paper called “washi”.

The distinctive Rhythm “cuckoo” sound is generated by the bellows and valves, remaining to be the sole analog sound created in this realm in this manner.

This traditional and distinctive feature as well as the warm analog sound production has been halted and switched over to digital today.

In spite of the global trend to halt this traditional mechanism, the Rhythm group has continued to honor the traditional feature for approximately 40 years.

The “washi” feature up until now remains a unique product that we continue to manufacture and promote on a daily basis.

The Cuckoo greets you every hour on the hour

From the beautiful window on the upper section of the clock, out comes an adorable cuckoo made of wood that feels like it can land in the palm of your hand.

You will be mesmerized when the cuckoo comes out and bows to you via air pressure that is pushed through the “washi” paper which is in synchronization with the sound and melody.

The cuckoo is made of wood whilst its beak is made of bamboo, reflecting the attractiveness as well as the superior texture.

The Characteristic Music Box and Motion Mechanism (4MJ422-R06 / 4MJ423-R07)

Following the evolution of the cuckoo clock, the mechanism of the “washi” paper, or adding a music box and various mechanisms, a list of additional technologies now exist due to the progress of the cuckoo clock.

We use the 18 note music boxes manufactured by Nidec, and those music boxes are encased in a wood frame, hence the sound coming out of it is truly impressive.

The tune “the blue Danube”, reflective of the Danube river in Germany's black forest, plays for approximately 15 seconds.

The water wheel also spins around in synchronization with the tune.

This clock's world view is complimented.

Rhythm Musical Clock Quick Set Up Guide

Rhythm Musical Clock Quick Set Up Guide

- Your demonstration makes a big difference -

1

Some clocks come with a foam piece in the back to stabilize the pendulum during shipping. Please remove it to free the pendulum.

2

Make sure to insert all batteries properly into the battery holder, usually located on the back or bottom of the clock.

3

Make sure the clock functions properly by pressing the MONITOR button, which is usually located on the side, the front, or the bottom of the clock, to make sure the clock plays the melodies and performs the Magic Motion.

4

Always make sure that the ON/OFF switch is on the ON position and the Volume Control is set at the proper level (usually maximum).

5

Display all musical wall clocks together to better capture the customers' attention. Set the clocks' times at 5 or 10 minutes apart so that the each clock plays the melodies at these intervals.

If the clock does not do so, check if all batteries are correctly installed, facing the same direction.

If it is a wall clock, always remember to hang it parallel to the wall to prevent the swinging / rotating pendulum from stopping.

6

Hang the laminated Model Tags along side each clock. These tags describe the tunes for each model.

Also, hang the "Ask for Demonstration" sign. These are great sales tools.

7

DEMONSTRATE THE CLOCKS TO YOUR CUSTOMERS!

Demonstration is always the key of success to sell Rhythm Musical Motion Clocks.

With proper demonstration and explanation, your customers will be able to tell how our clocks work every hour on the hour.

Remember that your demonstration makes a big difference.
