**The “washi” paper mechanism Rhythm continues to produce** the warm sound is produced when compressed air is instantly pushed through strips of traditional Japanese paper called “washi”.

The distinctive Rhythm “cuckoo” sound is generated by the bellows and valves, remaining to be the sole analog sound created in this realm in this manner. This traditional and distinctive feature as well as the warm analog sound production has been halted and switched over to digital today.

In spite of the global trend to halt this traditional mechanism, the Rhythm group has continued to honor the traditional feature for approximately 40 years. The “washi” feature up until now remains a unique product that we continue to manufacture and promote on a daily basis

## **The Cuckoo greets you every hour on the hour**

from the beautiful window on the upper section of the clock, out comes an adorable cuckoo that feels like it can land in the palm of your hand. You will be mesmerized when the cuckoo comes out and bows to you via air pressure that is pushed through the “washi” paper which is the synchronization with the sound.

## Dual Inversion Fan Technology

*The first of its kind for personal fans*

The RHYTHM Air is a dual blade fan that creates the most powerful airflow in any portable fan. The fan uses a double inversion fan technology. What that means is that the inverted rear 5 bladed fan pulls the air towards the front 7 bladed fan, and pushes twice the amount of air in a centralized wind flow. The centralized part is important because conventional portable fans push air like conventional room fans. Because the fans are personal fans, they are intended to be pointed in a specific location and our fans air-flow comes out in a very directional and centralized flow.

# Rhythm Musical Clock Quick Set Up Guide

## Rhythm Musical Clock Quick Set Up Guide - Your demonstration makes a big difference -

Some clocks come with a foam piece in the back to stabilize the pendulum during shipping. Please remove it to free the pendulum.

Make sure to insert all batteries properly into the battery holder, usually located on the back or bottom of the clock.

Make sure the clock functions properly by pressing the MONITOR button, which is usually located on the side, the front, or the bottom of the clock, to make sure the clock plays the melodies and performs the Magic Motion.

Always make sure that the ON/OFF switch is on the ON position and the Volume Control is set at the proper level (usually maximum).

Display all musical wall clocks together to better capture the customers' attention. Set the clocks' times at 5 or 10 minutes apart so that the each clock plays the melodies at these intervals.

If it is a wall clock, always remember to hang it parallel to the wall to prevent the swinging / rotating pendulum from stopping.

Hang the laminated Model Tags along side each clock. These tags describe the tunes for each model.

Also, hang the "Ask for Demonstration" sign. These are great sales tools.

**7 DEMONSTRATE THE CLOCKS TO YOUR CUSTOMERS!**  
**Demonstration is always the key of success to sell Rhythm Musical Motion Clocks.**  
 With proper demonstration and explanation, your customers will be able to tell how our clocks work every hour on the hour.  
**Remember that your demonstration makes a big difference.**
